The Notes Below Are An Integral Part of this Report | Track Record Compiled By: CTA Services

Program Description: The Program seeks to achieve significant profits across a broad variety of market conditions (both bull and bear markets, and inflationary and deflationary environments). To achieve their objectives, the Programs involve speculating in futures contracts (or options thereon) available for trading on any U.S. or European exchange. Trades are typically seasonal inter-commodity spreads. Some calendar spreads are also used. Options are normally not used but could be used in extreme market conditions for risk management purposes.

Investment Information

Program Start Date	Jun-2020
Minimum Investment	100,000
Management Fee	0.02
Incentive Fee	0.2
Margin	25% - 30%
Round Turns per Million	2,500
Currency	US Dollar
NFA No:	#0480000

Trading Strategy

100% Discretionary

Market Segment

- 5% Stock Indices
- 20% Currencies
- 10% Financials
- 10% Metals
- 20% Energies
- 20% Agriculturals
- 15% Meats

+ NOTES:

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2020-06-30 to 2024-09-30
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

ROR = Rate of Return

AG CTA Index: The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.

SP 500 TR: The S&P 500 indices are designed to reflect all sectors of the U.S. equity markets. The S&P 500 includes 500 blue chip, large cap stocks, which together represent about 75% of the total U.S. equities market. Companies eligible for addition to the S&P 500 have market capitalization of at least US\$3.5 billion. The TR Index accounts for the reinvestment of dividends.
