Program Description: Trident is a short-term systematic trading model that utilizes a technically based multi factor approach to generating strong risk adjusted returns under diverse market conditions in global futures markets. The system allocates its risk budget among directional and counter directional trading components. Trading leverage, as well as entry and exit signals, are dynamically determined and adjusted automatically by Trident based on current market volatility and momentum in order to more closely respond to the existing conditions in each market traded. Risk is strictly monitored and loss levels per trade are determined pre-entry for automatic exit while profits are allowed to run as Trident dynamically adjusts to protect trade profits as they accrue. The system trades highly liquid and diversified futures contracts in order to generate alpha across varying market segments and conditions.

The system trades futures in diverse market segments including: Currencies, Fixed Income, Energy, Precious and Base Metals, Agricultural and Softs Markets.

+ **NOTES:** Actual performance reflects General Partners' separately managed account trading conducted after January 1, 2019. Live trading during November-December 2018 (when trading first commenced) is not reflected, as lower leverage, debugging of trading strategy, and corrections with signal timing make such period unrepresentative of the Strategy. Returns presented from January 1, 2019, to May 31, 2019, represent the General Partners' separately managed account with the Global Macro strategy, management fees of 1.5% and incentive fees of 15% (Founders A Share Class) and, the performance does not include underlying fund expenses. From June 1, 2019, to the present, returns represent the Trident Fund LP Global Macro (1.5% mgmt and 20% incentive) and Global Macro Enhanced 2.0% mgmt and 20% incentive) share class returns and incorporate fund expenses such as administrator, audit, tax, and other operating costs. From March of 2023, the Global Macro Enhanced Four (4) was launched (4.5% mgmt and 20% incentive), incorporating fund expenses such as administrator, audit, tax, and other operating costs.

A Qualified Eligible Person ('QEP') must meet the following two requirements: 1) the investor must first be an accredited investor. The most common ways for this are to either have a net worth of \$1,000,000 or more OR an annual income of \$200,000 or more for the last two years OR, combined with a spouse, \$300,000 per year for two years, 2) the investor must meet an additional portfolio requirement, which is having \$2,000,000 in securities holdings OR \$200,000 in margin on deposit with a Futures Commission Merchant OR a combination of the two (for example, \$1,000,000 in securities and \$100,000 in margin).

PURSUANT TO AN EXEMPTION FROM THE COMMODITY FUTURES TRADING COMMISSION IN CONNECTION WITH ACCOUNTS OF QUALIFIED ELIGIBLE PERSONS, THIS BROCHURE OR ACCOUNT DOCUMENT IS NOT REQUIRED TO BE, AND HAS NOT BEEN, FILED WITH THE COMMISSION. THE COMMODITY FUTURES TRADING COMMISSION DOES NOT PASS UPON THE MERITS OF PARTICIPATING IN A TRADING PROGRAM OR UPON THE ADEQUACY OR ACCURACY OF COMMODITY TRADING ADVISOR DISCLOSURE. CONSEQUENTLY, THE COMMODITY FUTURES TRADING COMMISSION HAS NOT REVIEWED OR APPROVED THIS TRADING PROGRAM OR THIS BROCHURE OR ACCOUNT DOCUMENT.

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2019-11-30 to 2024-09-30
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

ROR = Rate of Return

SP 500 TR: The S&P 500 indices are designed to reflect all sectors of the U.S. equity markets. The S&P 500 includes 500 blue chip, large cap stocks, which together represent about 75% of the total U.S. equities market. Companies eligible for addition to the S&P 500 have market capitalization of at least US\$3.5 billion. The TR Index accounts for the reinvestment of dividends.
