The Notes Below Are An Integral Part of this Report | Track Record Compiled By: IQ-EQ Fund Administrator

Program Description: Trading is conducted from stripped down price charts. This means there are no lagging indicators outside of maybe a couple of moving averages to help identify dynamic support and resistance areas and trend. Whilst economic data and other global news events are the catalysts for price movements in a market, we don't need to analyze them to trade the market successfully. The reason is pretty simple; all economic data and world news that causes price movement within a market is reflected via price action on a market's price chart.

Disclosure

OTC Derivatives trading are high-risk investments. OTC Derivatives are leveraged products that can result in losses exceeding your initial deposit. Trading OTC Derivatives on margin carries a high level of risk, and may not be suitable for all individuals. The high degree of leverage offered can work against you as well as for you.

This is not a solicitation to invest and you should carefully consider your financial situation as to the suitability to your situation prior to making any investment or entering into any transaction. You should make yourself aware of all the risks associated with OTC Derivatives trading and seek advice from an independent financial advisor if you have any questions or concerns.

Past performance is not indicative of future results, returns may vary according to market conditions. Trading OTC Derivatives is speculative and may involve the loss of principal; therefore, funds placed under management should be risk capital funds that if lost will not significantly affect one's personal financial well-being.

No representation is being made that participating in a managed account will necessarily lead to profit. Investors may incur a series of consecutive losses and substantial equity drawdowns that can deplete their funds before the occurrence of any meaningful profit accumulation.

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.
