The Notes Below Are An Integral Part of this Report

Program Description: To use a diversified set of trading strategies to trade a diversified group of the most liquid commodity futures contracts while carefully limiting risk. By trading diversified strategies over a diversified set of commodities and managing the risk allocated an uncorrelated and robust return stream is sought that captures much of the upside in commodity bull markets and limits the downside in the inevitable deep corrections in commodity markets. The strategies traded, the regime identification risk allocation and the risk management have been used and proven while running the QDRA Dynamic Macro strategy since 2007. Whilst this strategy is relatively new as a standalone strategy, the trading models, dynamic risk allocation and systems used to create the strategy have all been part of another program that has generated significant alpha for over 14 years.

Investment Information

Program Start Date	Aug-2021
Minimum Investment	0
Management Fee	0.00%
Incentive Fee	0.00%
Margin	0-12%
Round Turns per Million	1,000
Currency	US Dollar
NFA No:	#0519012

+ NOTES:

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2021-08-31 to 2024-09-30
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

ROR = Rate of Return

AG CTA Index: The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.

SP 500 TR: The S&P 500 indices are designed to reflect all sectors of the U.S. equity markets. The S&P 500 includes 500 blue chip, large cap stocks, which together represent about 75% of the total U.S. equities market. Companies eligible for addition to the S&P 500 have market capitalization of at least US\$3.5 billion. The TR Index accounts for the reinvestment of dividends.
