Program Description: Athena UI is an Absolute Return Fund trading option strategies on equity indices since June 2008. The Athena strategy is based on a set of options strategies which are implemented step by step following our investment process. The Athena UI Fund is protected by a sophisticated risk management system that controls internal and external risk parameters real time. Additionally we use static and quantitative rules meeting the requirements of a state-of-the-art risk and money management. We only trade listed derivatives (options and futures) which offer high liquidity. Uncorrelated, consistent returns and a low volatility characterise the Athena UI Fund. We offer the highest possible transparency and daily liquidity. Athena's low correlation to equity and bond markets provides a high potential of diversification. Therefore Athena fits well to investors who set value on stability.
