Program Description: The Macro Equity Hedge strategy is a systematic program designed to produce stock market like returns over time with much lower volatility through a combination of protection and performance. The strategy is a made up of a long-only basket of Emini S&P futures, 10 year note futures, and gold futures. Additionally, a smaller portion of the strategy consists of a long/short currency breakout system. The strategy is governed by a proprietary systematic model that dynamically adjusts portfolio positions and weights.

+ NOTES: The performance set forth above is for a proprietary account maintained by a principal of County Cork traded pursuant to the Macro Equity Program. The performance has been proforma adjusted for a 1% (annualized) monthly management fee and a 10% quarterly incentive fee that would have been charged to a customer account participating in the Program, as well as actual commission and transaction fees, with profits reinvested. County Cork has chosen to use performance of a proprietary account in this presentation as it has continuously operated since inception.

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.
