+ **NOTES:** The performance shown is the hypothetical investment return based on a reduced volatility version of the Mosaic program. The returns were calculated by taking the actual daily returns achieved by the Mosaic program and reducing them by 58%, which calibrates the risk profile to the targeted 1% probability of an account experiencing a loss of 8% or greater in a one month period (or 21 trading days). There can be no assurance that had Revolution Capital Management, LLC offered this program during the period shown above, an investor's investment returns would have been as shown. Hypothetical investment returns have the benefit of hindsight in that the returns are being presented after the fact when the results of investment decisions are already known. Hypothetical results have certain inherent limitations, the most important of which is that past results give no assurance of future profits.

A Qualified Eligible Person ('QEP') must meet the following two requirements: 1) the investor must first be an accredited investor. The most common ways for this are to either have a net worth of \$1,000,000 or more OR an annual income of \$200,000 or more for the last two years OR, combined with a spouse, \$300,000 per year for two years, 2) the investor must meet an additional portfolio requirement, which is having \$2,000,000 in securities holdings OR \$200,000 in margin on deposit with a Futures Commission Merchant OR a combination of the two (for example, \$1,000,000 in securities and \$100,000 in margin).
