**The Notes Below Are An Integral Part of this Report**

**Program Description:** TARO® Diversified is an algorithmic and systematic investment strategy which aims to exploit market inefficiencies. The strategy is the result of years of quantitative research and market experience. TARO® Diversified uses unique techniques developed by FALGOM AG which are applied to futures in different asset classes. Although each of these markets has its own characteristics the algorithm is identical for each financial instrument. Furthermore, both long and short positions are entered by exactly the same logic, which turns TARO® Diversified in combination with its countertrend approach into a genuinely unbiased investment strategy. The return profile generated by TARO® Diversified is divergent towards traditional benchmark indices as well as alternative benchmarks. The strategy has no or a very low correlation towards these benchmarks which reduces portfolio risk in almost any institutional portfolio. Additionally, TARO® Diversified had the highest returns during periods when financial markets were under stress and therefore has the potential to minimize portfolio drawdowns.

For back-tested performance please contact Sandro Francioni, CEO, FALGOM AG, sf@falgom.com, +41 41 244 0080

**Investment Information**

Program Start Date	Feb-2022
Minimum Investment	10,000
Management Fee	1.5%
Incentive Fee	20.0%
Margin	0.8% - 19.1%
Round Turns per Million	4,000
Currency	Swiss Franc
NFA No:	#

**Trading Strategy**

**Market Segment**

**Program Statistics**

Peak-to-Valley Drawdown (1) (Oct 2022 - Sep 2024)	-26.81%
Worst Monthly Return (Feb 2023)	-6.43%
Current Losing Streak	-26.81%
Average Monthly Return	-0.58%

**Annualized Statistics**

Annualized Compounded ROR (2)	-7.17%
Standard Deviation	9.28%
Sharpe Ratio (4)	-0.86
36 Month Calmar Ratio (3)	N/A

+ **NOTES:** The Structured Products offered by FALGOM AG ("FALGOM") are not necessarily issued, guaranteed or equivalently secured by a Swiss bank, a Swiss insurance company, a Swiss securities firm or a foreign institution subject to equivalent prudential supervision (Art. 70 of the Federal Act on Financial Services, FINSA).

**This report is therefore exclusively addressed to professional clients according to Article 4 paragraphs 3-5 or according to Article 5 paragraphs 1 and 4 FINSA with domicile or residence in Switzerland.**

\*\* The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

#### Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2022-02-28 to 2024-09-30
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

#### ROR = Rate of Return

**AG CTA Index:** The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.
