**The Notes Below Are An Integral Part of this Report | Track Record Compiled By: SGGG Fund Services (Toronto)**

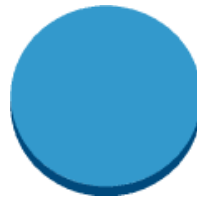

**Program Description:** The Program is a systematic managed futures strategy that trades exchange traded futures in 7 market sectors. The program targets annualized returns of 10-15% with an annualized standard deviation of 15%. The objective is to produce absolute returns that are non-correlated to equity and bond investments thus providing excellent diversification benefits for traditional investment portfolios. The portfolio is diversified across global commodity and financial futures and invests only in liquid exchange traded futures contracts. Initially, no more than 1/7 of the fund's risk will be allocated to any single sector ensuring broad portfolio diversification. The system is non-discretionary and aims to capitalize in both upward and downward trends. The strategy derives superior returns by adapting organically to changes in volatility and risk resulting in a greater efficiency in capturing the trends in each individual market traded. The strategy has a very low margin to equity ratio (average <7%) resulting in an efficient and scalable CTA exposure. Rigorous drawdown and scenario analysis is conducted to ensure robustness of the strategy and to provide clarity to the probable and possible return and risk scenarios.

**Investment Information**

Program Start Date	Apr-2004
Minimum Investment	2,000,000
Management Fee	2.00%
Incentive Fee	20.00%
Margin	7%
Round Turns per Million	400
Currency	US Dollar
NFA No:	#0401001

**Trading Strategy**

100% Systematic

**Market Segment**

- 14% Stock Indices
- 14% Currencies
- 14% Financials
- 14% Metals
- 14% Energies
- 14% Agriculturals
- 14% Softs
- 2% Other

+ **NOTES:** Returns are net of all fees, expenses, and interest. Please contact Auspice if you require the returns in any other configuration. For the Period between April 2006 to May 2007, the program started by trading a total of 11 markets. Markets were added as trades developed toward full diversification by the end of May 07. The current system and portfolio has been in place from June 07. Returns and simulations prior to 2007 are available by request.

A Qualified Eligible Person ('QEP') must meet the following two requirements: 1) the investor must first be an accredited investor. The most common ways for this are to either have a net worth of \$1,000,000 or more OR an annual income of \$200,000 or more for the last two years OR, combined with a spouse, \$300,000 per year for two years, 2) the investor must meet an additional portfolio requirement, which is having \$2,000,000 in securities holdings OR \$200,000 in margin on deposit with a Futures Commission Merchant OR a combination of the two (for example, \$1,000,000 in securities and \$100,000 in margin).

**PURSUANT TO AN EXEMPTION FROM THE COMMODITY FUTURES TRADING COMMISSION IN CONNECTION WITH ACCOUNTS OF QUALIFIED ELIGIBLE PERSONS, THIS BROCHURE OR ACCOUNT DOCUMENT IS NOT REQUIRED TO BE, AND HAS NOT BEEN, FILED WITH THE COMMISSION. THE COMMODITY FUTURES TRADING COMMISSION DOES NOT PASS UPON THE MERITS OF PARTICIPATING IN A TRADING PROGRAM OR UPON THE ADEQUACY OR ACCURACY OF COMMODITY TRADING ADVISOR DISCLOSURE. CONSEQUENTLY, THE COMMODITY FUTURES TRADING COMMISSION HAS NOT REVIEWED OR APPROVED THIS TRADING PROGRAM OR THIS BROCHURE OR ACCOUNT DOCUMENT.**

\*\* The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

#### Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2019-01-31 to 2024-09-30
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

#### ROR = Rate of Return

**AG CTA Index:** The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.

**SP 500 TR:** The S&P 500 indices are designed to reflect all sectors of the U.S. equity markets. The S&P 500 includes 500 blue chip, large cap stocks, which together represent about 75% of the total U.S. equities market. Companies eligible for addition to the S&P 500 have market capitalization of at least US\$3.5 billion. The TR Index accounts for the reinvestment of dividends.
