+ **NOTES:** While there are no management or incentive fees associated with WorldCupAdvisor.com leader-follower AutoTrade programs, monthly subscription fees do apply.

Performance shown on this report is based on end-of-month cumulative account balance. In order to realize the same percentage gains/losses and drawdowns as the lead account going forward, you must fund your account with an amount equivalent to the lead account's balance at the time of entry into the program (Matching Funds). We recommend that you open your account with Matching Funds. An up-to-the-minute Matching Funds total is available on the WCA Net Profit Calculator. Net profit calculated reflects advisor's initial investment of \$21,383.60, WCA subscription rate of \$250.00 per-month per-unit and standardized commission rate of \$29.98 per round-turn (includes estimated Exchange, Clearing and Transaction fees of \$4.98 per round turn). The actual amount of fees may vary with each specific futures contract traded. Accounts are available through any authorized AutoTrade™ trading service broker.

Trade quantities and frequency in the Jürg Diemand account do not fluctuate with changes in account equity, and Matching Funds may not be needed to meet and maintain margin requirements. If you fund with less than Matching Funds, your investment is considered "notional" and your account's performance, good or bad, will be accentuated on a percentage basis. Conversely, if you fund with more than Matching Funds, you will be de-leveraging your investment, and your gains/loss and drawdowns will be less than those experienced in the lead account on a percentage basis. The Letter of Direction you are required to sign before participating in any WCA program contains a chart that illustrates how notional funding can dramatically affect your investment. Please refer to this chart before notionally funding an account.

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

\$250 per month per account

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2020-12-31 to 2024-09-30
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

ROR = Rate of Return

AG CTA Index: The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.

This report has been prepared from information provided by the Trader and is believed to be reliable. This report should be read in conjunction with the Trader's Disclosure Document.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. TRADING FUTURES AND OPTIONS INVOLVES SUBSTANTIAL RISK OF LOSS AND IS NOT SUITABLE FOR ALL INVESTORS. THERE ARE NO GUARANTEES OF PROFIT NO MATTER WHO IS MANAGING YOUR MONEY. THERE IS AN UNLIMITED RISK OF LOSS IN SELLING OPTIONS. YOU SHOULD CAREFULLY CONSIDER WHETHER COMMODITY FUTURES AND OPTIONS IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION. AN INVESTOR MUST READ AND UNDERSTAND THE MANAGER'S CURRENT DISCLOSURE DOCUMENT BEFORE INVESTING.
