# The Notes Below Are An Integral Part of this Report | Track Record Compiled By: Michael Liccar

Program Description: The County Cork Diversified Commodity Long/Short Strategy uses the relationship between cash and futures prices to establish directional positions in the futures markets. It is fully systematic and focuses on the timing as well as the magnitude of basis changes allowing for continuous risk management of open positions. The Program trades futures contracts in three market sectors: agriculture, metals, and energy. It combines commercial logic with quantitative algorithms using fundamental price data. It leverages the decades of experience of Robert J. O'Brien Jr. in the agriculture space. Our model was developed for an under exploited niche market sector.
