Program Description: QCM offers investors a directional systematic global macro strategy that is actively managed. The strategy strives to generate long-term capital appreciation in a liquid investment through a set of proprietary models that generate uncorrelated absolute returns. QCM's approach combines decades of fundamental knowledge and experience of the markets with sound mathematical and technical skills. The strategy engineered into the overall QCM systematic model uses a combination of innovative strategic and tactical tools, driven at the macro level by a proprietary dynamic asset allocation algorithm. The individual components of the model are not correlated. Risk is managed top-down and bottom-up covering individual components as well as the portfolio.

In November 2018 QCM implemented its most significant and powerful upgrade to the firm's proprietary Systematic Model that drives its QCM SMP. This runs a long/short systematic macro strategy on Financial and Commodity futures generating its alpha through a set of uncorrelated components that operate independently, each pursuing their own return and risk.

+ **NOTES:** In November 2018 QCM implemented milestone upgrades into its flagship GDP programme after a 3 year deep dive on its system. We opened up every piece of our portfolio management systems, re-examined all aspects of our strategy, identified weaknesses, corrected them and made them more future proof to handle newer environments more effectively. Over and above, we have added various new alpha tools to take the QCM Model that drives the investment process several levels higher.

A Qualified Eligible Person ('QEP') must meet the following two requirements: 1) the investor must first be an accredited investor. The most common ways for this are to either have a net worth of \$1,000,000 or more OR an annual income of \$200,000 or more for the last two years OR, combined with a spouse, \$300,000 per year for two years, 2) the investor must meet an additional portfolio requirement, which is having \$2,000,000 in securities holdings OR \$200,000 in margin on deposit with a Futures Commission Merchant OR a combination of the two (for example, \$1,000,000 in securities and \$100,000 in margin).

PURSUANT TO AN EXEMPTION FROM THE COMMODITY FUTURES TRADING COMMISSION IN CONNECTION WITH ACCOUNTS OF QUALIFIED ELIGIBLE PERSONS, THIS BROCHURE OR ACCOUNT DOCUMENT IS NOT REQUIRED TO BE, AND HAS NOT BEEN, FILED WITH THE COMMISSION. THE COMMODITY FUTURES TRADING COMMISSION DOES NOT PASS UPON THE MERITS OF PARTICIPATING IN A TRADING PROGRAM OR UPON THE ADEQUACY OR ACCURACY OF COMMODITY TRADING ADVISOR DISCLOSURE. CONSEQUENTLY, THE COMMODITY FUTURES TRADING COMMISSION HAS NOT REVIEWED OR APPROVED THIS TRADING PROGRAM OR THIS BROCHURE OR ACCOUNT DOCUMENT.

** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Please note that the monthly performance numbers, ROR and Drawdowns are based on end of month values and are not reflective of intramonth volatility.

Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2019-01-31 to 2024-07-31
2. The Annualized Compounded ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Calmar Ratio Uses last 36 months of Data

ROR = Rate of Return

AG CTA Index: The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.

SP 500 TR: The S&P 500 indices are designed to reflect all sectors of the U.S. equity markets. The S&P 500 includes 500 blue chip, large cap stocks, which together represent about 75% of the total U.S. equities market. Companies eligible for addition to the S&P 500 have market capitalization of at least US\$3.5 billion. The TR Index accounts for the reinvestment of dividends.
